U.S. Patent and Trademark Office PTOL-303 (Rev. 7-05)

Continuation of 11. does NOT place the application in condition for allowance because: the Examiner maintains his position that Manchester Encoding has been used since late 1940 and clearly was invented before December 12/12/2000, which is the priority date of the application. In addition, the issue of whether "the inventors of the '108 Karolys patent are ones skilled in the art and presumably knew of the '1 19 Hanna patent, but did not think to use asynchronous communication" is irrelevant to the 35 USC 103 (a) rejection. The MPEP 2141 clearly states that t'Office policy has consistently been to follow Graham v. John Deere Co. in the consideration and determination of obviousness under 35 U.S.C. 103. As quoted above, the four factual inquires enunciated therein as a background for determining obviousness are briefly as follows:

- (A) Determining of the scope and contents of the prior art',
- (B) Ascertaining the differences between the prior art and the claims in issue',
- (C) Resolving the level of ordinary skill in the pedinent aft; and
- (D) Evaluating evidence of secondary considerations.

With regard to Applicants' request for an interview, an Applicant Initiated Interview Request form (PTOL-413A) must be submitted to the examiner prior to the interview. Form PTOL-413A can be found here:

http://www.uspto.gov/web/forms/PTOL413A.pdf

Further, Applicants' attention is directed to MPEP 713.09, which states that "[n]ormally, one interview after final rejection is permitted. However, prior to the interview, the intended purpose and content of the interview should be presented briefly, preferably in writing. Such an interview may be granted if the examiner is convinced that disposal or clarification for appeal may be accomplished with only nominal further consideration. Interviews merely to restate arguments of record or to discuss new limitations which would require more than nominal reconsideration or new search should be denied. See MPEP § 714.13."
